

Airmax- Air Curtain

Customized Management of

Air Max Air Curtain

This is the very first step toward a healthy and safe living environment.

What is Air Max Air Curtain?

Air Max Air Curtains are installed on both sides of the entrance, and strongly discharge air from left to right, right to left, and in both directions to block internal and external air flow. Thus, the users can expect the following effects;

- ❶ It prevents micro-dust and harmful bacteria entering the room from outside
- ❷ When cooling or heating, heat loss can be prevented.
- ❸ It can block the inflow of odors and dusts, and small insects such as flies and mosquitoes.
- ❹ It blocks micro-dust that adheres to the body of the person who enters into the room.

Only 3 seconds!

Blocking the Micro-dust!

Air Max Air Curtain

Invest 3 seconds and enjoy the pleasant indoor environment!

STEP
1

Its sensor
detects people
approaching
